- Purpose built commercial kitchen

## ENVIRONMENTAL INITIATIVES

- Our menu – Enjoy most foods grown within a 100 mile radius of Pymont.’
- Structural concrete – An Australian first, made from recycled products
- High quality air – 50% higher levels of fresh air supply compared to Australian standards
- Lighting connected to occupancy sensors – Daylight sensors are a means of reducing the energy consumption
- Water efficient fixtures – Meets all green standards in reducing water wastage
- Waste management & recycling systems – To reduce the degree of landfill waste
- Reduced amount of poly vinyl chloride – PVC free electric cabling and plumbing
- Energy monitoring, waste reduction & recycling – Water monitoring and the use of cleaning products that have a low environmental impact
- Air conditioning HVAC system – Uses a refrigerant that has zero ozone depletion potential
- Thermal insulation – Avoids the use of ozone depleting substances in both its manufacturing & composition
- Black water recycling – Reused for watering the adjoining parklands
- Environmentally rated carpet – Reducing the impact on the environment from the manufacturing processes
- Ortech insulation ceiling – An acoustic and thermal reducing panel that is a low embodied energy product, made from a renewable annual resource
- V-KOOL film on glass – Provides a virtually transparent protective barrier against the sun’s heat and radiation
- External views – Let’s not forget to mention the views of the harbour which provide tranquillity to our patrons, reducing stress levels and introducing karma!
